

Redefining commands

Jonathan Bowden

3rd April 2018

1 Introduction

These are a few ways to control the typesetting output

1.1 Continuing a list

1. First
2. Second

But now I have more to say

3. Third
4. Fourth

You can do this without a package too

5. Fifth
6. Sixth

1.2 Changing the numbers

- A. One
- B. Two
- C. Three

1.3 Changing the bullets

- Ready
- Steady
- Go

2 Conclusion

We can control the output using packages, and by renewing `LATEX` commands.
